

## Martha Sandy Biographical Sketch

Dr. Sandy is Chief of the Reproductive and Cancer Hazard Assessment Branch in the California Environmental Protection Agency's (Cal/EPA) Office of Environmental Health Hazard Assessment (OEHHA). Dr. Sandy's Branch conducts scientific evaluations of the risks of cancer and reproductive hazards from exposure to chemicals present in environmental media, food, fuels and consumer products, and works collaboratively with California's Department of Public Health and Department of Toxic Substances Control to implement California's biomonitoring program.

Prior to joining OEHHA, she conducted research investigating biochemical and genetic susceptibility factors in Parkinson's disease, and biochemical and molecular mechanisms of toxicity and carcinogenicity. She has served on several scientific committees for the U.S. Environmental Protection Agency, the National Toxicology Program, and the National Academy of Sciences. Dr. Sandy has a Ph.D. and an M.P.H. in Environmental Health Sciences, with an emphasis in Toxicology, from the University of California, Berkeley's School of Public Health.
